Did You Know? The U.S. Space Force was established on December 20, 2019 when the National Defense Authorization Act was signed into law, creating the first new branch of the armed services in 73 years. The establishment of the USSF resulted from widespread recognition that Space was a national security imperative. When combined with the growing threat posed by near-peer competitors in space, it became clear there was a need for a military service focused on solely on pursuing superiority in the space domain.
